

SEO AUDIT PRO

SEO Site Audit Report

<https://nextjs.org/docs>

November 20, 2025

Service Tier: Standard

Executive Summary...

Service Details

Service Tier

Standard - Full site audit with technical, on-page, and performance checks.

⚡ **Fast Delivery: 1-day delivery enabled**

Included Add-Ons

- Competitor Keyword Gap Report - +\$15.00
- Fast Delivery - +\$10.00
- Additional Pages (1 page) - +\$5.00
- Additional Keywords (1 keyword) - +\$1.00
- Schema Markup Analysis - +\$15.00

Executive Summary

Executive Summary

This SEO audit examined 21 pages from your website to assess technical SEO, on-page optimization, content quality, and accessibility. The analysis identified 25 issues across these categories, with 2 high-priority, 21 medium-priority, and 2 low-priority findings.

Overall Performance

Your website received an overall SEO score of 80/100. This indicates strong SEO fundamentals with room for optimization in specific areas. Category scores break down as follows:

- Technical SEO: 85/100 - This measures crawlability, site structure, robots.txt, sitemap.xml, and HTTP status codes.
- On-Page SEO: 75/100 - This evaluates page titles, meta descriptions, heading structure (H1/H2), and canonical tags.
- Content Quality: 100/100 - This assesses word count, content depth, and thin page detection.
- Accessibility: 62/100 - This reviews image alt attributes and mobile responsiveness indicators.

Key Findings

Technical SEO: 3 issues found, including 0 high-priority.

On-Page SEO: 17 issues identified.

Accessibility: 3 issues found. 3 pages have images missing alt text, which impacts both accessibility and SEO.

Recommended Next Steps

1. Address all 2 high-priority issues first, as these have the most significant impact on SEO performance
2. Add descriptive alt text to all images for accessibility and SEO benefits

This report provides detailed information on each issue, including affected pages and specific recommendations for resolution.

Priority Action Plan

Address issues in this order for maximum SEO impact:

Week 1: High Priority Issues (2)

These issues have the most significant impact on SEO performance. Fix these first.

1. **Missing alt attributes on images** (16 of 28)
2. **Missing alt attributes on images** (33 of 34)

Week 2: Medium Priority Issues (21)

Address these after high-priority fixes are complete.

1. **robots.txt unreachable**
robots.txt file exists but cannot be accessed (may return errors).
2. **Missing Identity Schema** (17 pages)
No Organization or Person Schema identified. The absence of Organization or Person Schema can make it harder for Search Engines and LLMs to identify the ownership of a website.
3. **Missing schema markup** (4 pages)
No Schema.org structured data detected. Add JSON-LD or microdata to help search engines understand your content.
4. **Duplicate meta description** (Found on 3 pages)
5. **Page title too short** (1 page)
Title is 22 characters (recommended: 50-60)
6. **Meta description too short** (1 page)
Description is 37 characters (recommended: 120-160)
7. **Meta description too short** (5 pages)
Description is 64 characters (recommended: 120-160)
8. **Meta description too short** (1 page)
Description is 76 characters (recommended: 120-160)
9. **Meta description too short** (1 page)
Description is 83 characters (recommended: 120-160)

10. Meta description too short (1 page)

Description is 96 characters (recommended: 120-160)

Extracted Keywords

SEO Scores Overview

Overall Score

80

Technical SEO

85

On-Page SEO

75

Content Quality

100

Accessibility

62

Total Pages

21

Issue Breakdown: 2 High Priority, 21 Medium Priority, 2 Low Priority

Technical SEO Issues

[Medium] robots.txt unreachable

robots.txt file exists but cannot be accessed (may return errors).

How to Fix:

1. Create a robots.txt file in your website's root directory (e.g.,
<https://yoursite.com/robots.txt>)
2. Ensure it's accessible and returns a 200 status code
3. Use it to control which pages search engines can crawl (e.g., "User-agent: *
Allow: /" to allow all)
4. Test it using Google Search Console's robots.txt Tester tool

[Medium] Missing Identity Schema

No Organization or Person Schema identified. The absence of Organization or Person Schema can make it harder for Search Engines and LLMs to identify the ownership of a website.

Affected: 17 pages

How to Fix:

1. Add Organization or Person Schema using JSON-LD format
2. Include required fields: name (required), url (required for Organization)
3. Add optional but recommended fields: logo, email, phone, address
4. Place schema in <head> or <body> as JSON-LD script tag
5. Validate schema using Google's Rich Results Test
6. Example: <script type="application/ld+json">
{ "@context": "https://schema.org", "@type": "Organization", "name": "Your Company", "url": "https://yoursite.com" }</script>

[Medium] Missing schema markup

No Schema.org structured data detected. Add JSON-LD or microdata to help search engines understand your content.

Affected: 4 pages

How to Fix:

1. Add schema.org structured data to your pages using JSON-LD (recommended) or microdata
2. For JSON-LD, add a script tag in the <head> section: <script type="application/ld+json">{...}</script>
3. Use appropriate schema types (e.g., Organization, WebPage, Article, Product, LocalBusiness)
4. Validate your schema using Google's Rich Results Test tool
5. Common schemas: Organization (for homepage), Article (for blog posts), Product (for e-commerce)
6. Example JSON-LD:
`{"@context": "https://schema.org", "@type": "Organization", "name": "Your Company"}`

On-Page SEO Issues

[Medium] Duplicate meta description

Found on 3 pages

Affected: 3 pages

How to Fix:

1. Review all pages with duplicate meta descriptions from the affected pages list
2. Write unique descriptions for each page that highlight their specific content
3. Include page-specific keywords or value propositions
4. Update the <meta name="description"> tag on each affected page
5. Ensure each page has a distinct, compelling description

[Medium] Page title too short

Title is 22 characters (recommended: 50-60)

Affected: 1 page

How to Fix:

1. Expand your page title to at least 50 characters
2. Add more descriptive text that includes relevant keywords
3. Include your brand name or location if space allows
4. Ensure the title accurately describes the page content
5. Test how it appears in search results (keep under 60 characters to avoid truncation)

[Medium] Meta description too short

Description is 37 characters (recommended: 120-160)

Affected: 1 page

How to Fix:

1. Expand your meta description to 120-160 characters
2. Add more detail about what users will find on the page
3. Include a call-to-action if space allows

4. Make it compelling to improve click-through rates from search results
5. Ensure it accurately represents the page content

[Medium] Meta description too short

Description is 64 characters (recommended: 120-160)

Affected: 5 pages

How to Fix:

1. Expand your meta description to 120-160 characters
2. Add more detail about what users will find on the page
3. Include a call-to-action if space allows
4. Make it compelling to improve click-through rates from search results
5. Ensure it accurately represents the page content

[Low] Page title too long

Title is 81 characters (recommended: 50-60)

Affected: 1 page

How to Fix:

1. Shorten your page title to 50-60 characters
2. Remove unnecessary words or brand names if they push it over the limit
3. Keep the most important keywords at the beginning
4. Use a pipe (|) or dash (-) to separate key phrases if needed
5. Preview in search results to ensure it displays fully

[Medium] Meta description too short

Description is 76 characters (recommended: 120-160)

Affected: 1 page

How to Fix:

1. Expand your meta description to 120-160 characters
2. Add more detail about what users will find on the page
3. Include a call-to-action if space allows

4. Make it compelling to improve click-through rates from search results
5. Ensure it accurately represents the page content

[Medium] Meta description too short

Description is 83 characters (recommended: 120-160)

Affected: 1 page

How to Fix:

1. Expand your meta description to 120-160 characters
2. Add more detail about what users will find on the page
3. Include a call-to-action if space allows
4. Make it compelling to improve click-through rates from search results
5. Ensure it accurately represents the page content

[Medium] Meta description too short

Description is 96 characters (recommended: 120-160)

Affected: 1 page

How to Fix:

1. Expand your meta description to 120-160 characters
2. Add more detail about what users will find on the page
3. Include a call-to-action if space allows
4. Make it compelling to improve click-through rates from search results
5. Ensure it accurately represents the page content

[Low] Meta description too long

Description is 187 characters (recommended: 120-160)

Affected: 1 page

How to Fix:

1. Shorten your meta description to 120-160 characters
2. Remove unnecessary words while keeping the core message
3. Focus on the most important information and keywords

4. Ensure it displays fully in search results (Google typically shows ~155 characters)
5. Keep the most compelling part at the beginning

[Medium] Meta description too short

Description is 91 characters (recommended: 120-160)

Affected: 1 page

How to Fix:

1. Expand your meta description to 120-160 characters
2. Add more detail about what users will find on the page
3. Include a call-to-action if space allows
4. Make it compelling to improve click-through rates from search results
5. Ensure it accurately represents the page content

[Medium] Meta description too short

Description is 48 characters (recommended: 120-160)

Affected: 1 page

How to Fix:

1. Expand your meta description to 120-160 characters
2. Add more detail about what users will find on the page
3. Include a call-to-action if space allows
4. Make it compelling to improve click-through rates from search results
5. Ensure it accurately represents the page content

[Medium] Meta description too short

Description is 59 characters (recommended: 120-160)

Affected: 1 page

How to Fix:

1. Expand your meta description to 120-160 characters
2. Add more detail about what users will find on the page
3. Include a call-to-action if space allows

4. Make it compelling to improve click-through rates from search results
5. Ensure it accurately represents the page content

[Medium] Meta description too short

Description is 68 characters (recommended: 120-160)

Affected: 1 page

How to Fix:

1. Expand your meta description to 120-160 characters
2. Add more detail about what users will find on the page
3. Include a call-to-action if space allows
4. Make it compelling to improve click-through rates from search results
5. Ensure it accurately represents the page content

[Medium] Meta description too short

Description is 39 characters (recommended: 120-160)

Affected: 1 page

How to Fix:

1. Expand your meta description to 120-160 characters
2. Add more detail about what users will find on the page
3. Include a call-to-action if space allows
4. Make it compelling to improve click-through rates from search results
5. Ensure it accurately represents the page content

[Medium] Meta description too short

Description is 38 characters (recommended: 120-160)

Affected: 1 page

How to Fix:

1. Expand your meta description to 120-160 characters
2. Add more detail about what users will find on the page
3. Include a call-to-action if space allows

4. Make it compelling to improve click-through rates from search results
5. Ensure it accurately represents the page content

[Medium] Meta description too short

Description is 69 characters (recommended: 120-160)

Affected: 1 page

How to Fix:

1. Expand your meta description to 120-160 characters
2. Add more detail about what users will find on the page
3. Include a call-to-action if space allows
4. Make it compelling to improve click-through rates from search results
5. Ensure it accurately represents the page content

[Medium] Meta description too short

Description is 31 characters (recommended: 120-160)

Affected: 1 page

How to Fix:

1. Expand your meta description to 120-160 characters
2. Add more detail about what users will find on the page
3. Include a call-to-action if space allows
4. Make it compelling to improve click-through rates from search results
5. Ensure it accurately represents the page content

Accessibility Issues

[Medium] Missing alt attributes on images

2 of 29 images missing alt text

Affected: 1 page

How to Fix:

1. Add descriptive alt attributes to all images on affected pages
2. Describe what the image shows or its purpose (e.g., alt="Woman using laptop at desk")
3. Keep alt text concise (under 125 characters recommended)
4. For decorative images, use alt="" (empty but present)
5. Include relevant keywords naturally if the image is content-related
6. Example:

[High] Missing alt attributes on images

16 of 28 images missing alt text

Affected: 1 page

How to Fix:

1. Add descriptive alt attributes to all images on affected pages
2. Describe what the image shows or its purpose (e.g., alt="Woman using laptop at desk")
3. Keep alt text concise (under 125 characters recommended)
4. For decorative images, use alt="" (empty but present)
5. Include relevant keywords naturally if the image is content-related
6. Example:

[High] Missing alt attributes on images

33 of 34 images missing alt text

Affected: 1 page

How to Fix:

1. Add descriptive alt attributes to all images on affected pages
2. Describe what the image shows or its purpose (e.g., alt="Woman using laptop at desk")

- 3. Keep alt text concise (under 125 characters recommended)
- 4. For decorative images, use alt="" (empty but present)
- 5. Include relevant keywords naturally if the image is content-related
- 6. Example:

Competitor Keyword Gap Analysis

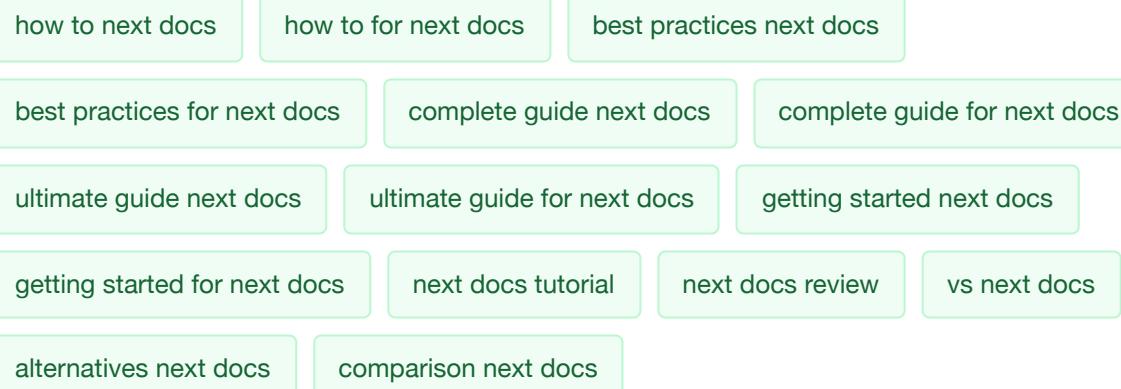

Analysis based on next docs industry patterns and competitor research. This analysis identifies niche-specific keyword opportunities by combining your site's core topics with common SEO patterns used by competitors in your industry.

Keyword Gaps (Opportunities)

These keywords are commonly used by competitors but missing from your site:

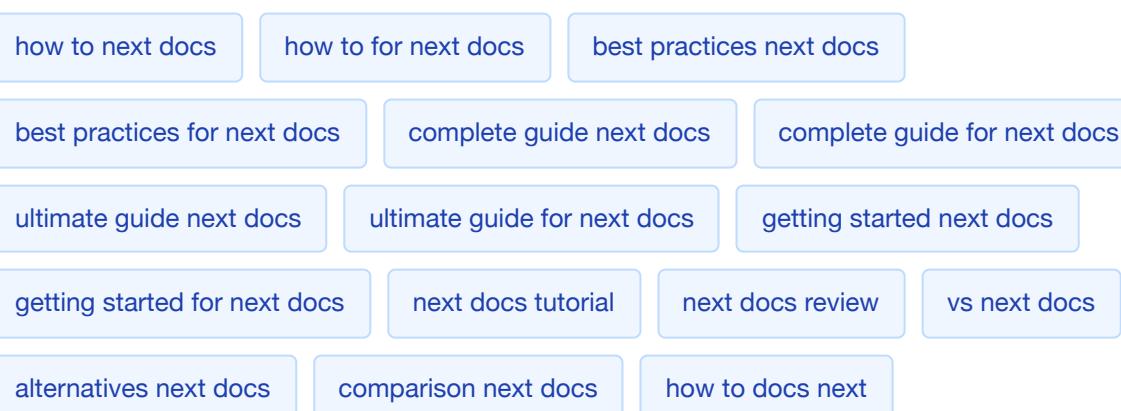

Shared Keywords

Keywords you're already targeting that competitors also use:

Competitor Keywords Analyzed

Common keywords found in competitor analysis:

how to for docs next

best practices docs next

best practices for docs next

complete guide docs next

complete guide for docs next

ultimate guide docs next

ultimate guide for docs next

getting started docs next

getting started for docs next

Recommendations

1. Create content targeting the identified keyword gaps to capture additional search traffic
2. Optimize existing pages for shared keywords to improve rankings
3. Monitor competitor content strategies and adapt your approach accordingly
4. Focus on high-value keyword gaps that align with your business goals
